## Rapid prefab construction for emergency response

**In response to COVID-19, many health systems across North America will require renovations or new/temporary facilities to meet overwhelming patient care needs.**

DIRTT is ready to partner with healthcare providers to rapidly design, manufacture and install a variety of healthcare interiors. DIRTT's approach to healthcare construction allows interiors to be manufactured in 21 days or less in controlled factories with extreme precision. Components are shipped to site for a clean and seamless install. The result is unprecedented speed, allowing healthcare facilities to get up and running faster to service patients.

DIRTT is designed for disassembly, ensuring quicker maintenance and easy adjustments as conditions change. Although they can function as permanent interiors, DIRTT solutions can be repurposed to support different requirements in the future. This secures your investment and gives you the ability to adapt to changing needs.

### Interior solutions

#### **WALLS, DOORS & MILLWORK**

Durable finishes applied offsite. Clean, non-disruptive installs.

#### **FLEXIBLE MEDICAL GAS**

Reduces schedules. Adaptive for future changes.

#### **INFECTION PREVENTION AND CONTROL**

Gasketed and sealed system. Easy to clean.

#### **MODULAR POWER**

Pre-wired in DIRTT factories. Quick-connect installation.

#### **UL assemblies**

Adjustable UL listed aluminum frame assemblies with blocking and insulation.

#### **UL components**

Factory-installed multi-trade UL components.

#### **Rapidly deployed interior construction**

Quickly manufactured, delivered and installed throughout North America.

**DIRTT can be used to renovate existing facilities, retrofit trailers or convert open spaces to meet emergency requirements.**

### **Identified DIRTT builds for COVID-19 response:**

Work with your local DIRTT team to plan, design and build the right solution for your needs.

#### 1. RENOVATIONS

- Transition existing lower acuity units to high acuity units
- Repurpose administration spaces to triage or overflow areas
- Convert cold shell spaces to isolation rooms, triage or overflow areas

#### 2. TEMPORARY FACILITIES: **STRUCTURE** BY OTHERS, INTERIOR CONSTRUCTION BY DIRTT\*

- Triage, treatment and administration spaces
- Drive-through testing and labs stations
- Isolation rooms

#### 3. TEMPORARY FACILITIES: **TRAILER** BY OTHERS, INTERIOR CONSTRUCTION BY DIRTT\*

- Triage, treatment and administration spaces
- Drive-through testing and labs stations
- Isolation rooms

*\*Work with your local DIRTT team to plan the right solution for your needs. DIRTT will leverage technology to build it quickly. We will tailor a solution specific to your needs and site conditions.*

### **DIRTT builds include:**

- Exam rooms
- Triage rooms
- Patient rooms
- Isolation rooms
- Diagnostic labs
- Headwall

*DIRTT solutions transform a shipping container into a fully-functional medical clinic*
